

This Statement of Authorship must be included with every submitted assessable piece of work. Read the statement of authorship carefully before signing it. It is your responsibility to follow the instructions of your lead educator in relation to each assessment task.

For transparency, you may choose to include with your assessment submission an additional written statement which details your use of Generative Artificial Intelligence (GenAI) and/or other sources. You do not have to include a written statement. Should you choose to do so, you can find sample statements on the [Academic Integrity website](#).

Students are encouraged to approach the use of GenAI with caution, recognising both its risks and the opportunities for learning. Visit AI@Bond for [more information on GenAI](#).

Statement of Authorship

I declare that this assessment is my original work and no part was copied or reproduced from any other person's work or any other source (including artificial intelligence) without appropriate attribution.

I further certify that in completing this assessment task:

- (1) I have not engaged in unauthorised use of Generative Artificial Intelligence (GenAI), where 'unauthorised' means beyond the scope of the approval to use GenAI communicated in writing by the lead educator for my subject; and
- (2) If the use of Generative Artificial Intelligence (GenAI) was permitted for this assessment task, I have clearly disclosed within my work the extent of my use of GenAI in completing the assessment task through identifying and referencing relevant parts which have been written by GenAI and those parts where GenAI has assisted with the development and writing.

Both handwritten and typed signatures are considered legal signatures. You may use either form of signature on this document.
